# *Triple Crown*

The Triple Crown design exceeds all expectations of a serious tournament shooter period. The trick has always been for a bowyer to design a bow that post high feet per second numbers without forfeiting bow stability and accuracy. At the same time the Triple Crown meets the NFAA and IBO legal requirements with its D shape when strung. The Triple Crown offers a fully shaped riser that allows the shooter to maintain a consistent grip for every shot. With this bow design we have been able to capture the shooters dream of speed, accuracy and stability at the same time. The Triple Crown is offered in 64", 66" and 68" length, it also can be ordered with carbon backed limbs and a full or half micarta riser optional and is fast flight ready.

# Royal Crown

This bow will change your mind about long bow shooting. If you are a recurve shooter that always wanted to shoot a long bow but never felt confident with one you need to give the Royal Crown a try. The forward hand design helps you hit where you are looking, plus the full shaped grip locks your hand in perfect position every time. When the pre-loaded hybrid limbs, unleash an arrow with no hand shock and hit exactly where you are looking you will know that you just found your new best friend. The Royal Crown is offered in 58", 60", 62" and 64" lengths. The Royal Crown is not legal for NFAA shooting, the limbs show reflex when strung.

# Traditional Long Bow

Fox Traditional Long Bows utilize the highly effective time proven deflex/reflex design. The long tapered fadeouts, deep core and narrow trapezoid limbs that follow the true lines of a traditional long bow, make this a great choice for the purist who desires simplicity. Lengths offered are 58", 60", 62", 64", 66", and 68".

# High Sierra Recurve

The High Sierra take down speaks for itself. It is our hard work and pride that provide you with our top of the line bow. Nothing has been held back to provide you with a truly superior design. This bow is the epitome of the bowyers art, creating the perfect partnership of strength and beauty. Its a bow that consumes you with its performance and dazzling appearance. A bow that has stood the test of time and you can be proud and confident to take in the woods. The High Sierra features include, totally custom made with hand selected exotic and domestic woods. Positive limb lock design. Easy bolt on quiver. Reinforced tips to handle fast flight strings. Two riser lengths 17" is fitted with 56", 58" and 60" limbs and 19" riser is fitted to a 62" 64" 66" limbs.

# "Maverick"

The name Maverick says it all, "It simply stands alone". The Maverick is a very quick, smooth shooting and extremely stable one-piece recurve. The design reveals beautiful lines and smooth curves that are guaranteed to stop you in your tracks! The Maverick is offered in a 58" and 62" length. The tips are reinforced and the Maverick is fast flight string ready.

# "THE BREED"

For the Archer that is torn between a Long Bow and a Recurve. The Breed is a light weight slender fifty's style design with a slightly off set grip, which allows the archer to convert between a Long Bow and Recurve with ease. Besides the stunning appearance, this bow is very quiet and smooth and retains lighting speed. The Breed comes in 3 lengths 54", 58" and 62" and optional sleeve style Take Down and is fast flight ready. "An awesome bow for blinds"
